What is an arbitrary function Quora

Arbitrary function means any function. But generally, it refers to a function belongs to the same class of functions we are discussing (it's freedom is limited). For example, when talk about continuous real valued functions defined on bounded closed interval of the real line, by an arbitrary function may refers to a function of the same type.

Arbitrary waveform generator Wikipedia

An arbitrary waveform generator (AWG) is a piece of electronic test equipment used to generate electrical waveforms. These waveforms can be either repetitive or single-shot (once only) in which case some kind of triggering source is required (internal or external). The resulting waveforms can be injected into a device under test and analyzed as they progress through it, confirming the proper operation of the device or pinpointing a fault in it.
