**How much would a 17,500,000 carats diamond cost? - Quora**

Diamond prices, unfortunately, are incredibly difficult to predict. The reasons are several: artificial inflation, discovery of new mines, quality, advent of quality artificial diamonds. Not to mention, controlling for quality/color/clarity in a diamond, the carat weight and price relationship is non-linear.

**Diamond Prices - How to Compare Costs And Value (Proven ...**

The cost of a diamond is calculated on a price per carat basis and utilizes the following formula:  $\text{Cost} = \text{Carat Weight} \times \text{Diamond Price Per Carat}$ . As an example, let's assume that the price per carat for a 0.50 round brilliant diamond is \$4,200. The calculated cost for the stone would be \$2,100 ( $0.50 \times \$4,200$ ).
